DETAILED ACTION

Response to Arguments

Applicant erroneously has stated that claims 1-20 and 38-40 are pending and responded in his remarks regarding to claims 1-20 and 38-40. Examiner would like to point out that as of the Election Restriction Requirement dated 3/28/06 the Applicant had elected without traverse Group II Claims 17-20, and the Non-Final Office action sent out on 11/21/2006 rejected only Claims 17-20 as stated on the office action summary and pages 2 and 3 of the Non-Final Office action.

Applicants remarks to Claims 17-20 have been considered the rest of the remarks have not been considered as those claims were withdrawn from prosecution.

Applicant arguments in regards to claims 17-20 have been considered but are moot. Applicant argues that the Holcomb reference is not enabling as to the application of at least two different magnetic fields for controlling an element of a medical device within a body (see remarks page 8). However, *the application of at least two different magnetic fields for controlling an element of a medical device within a body* is not present in independent claim 17, and therefore the arguments are moot.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., two different magnetic fields for controlling an element of a medical device within a body) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

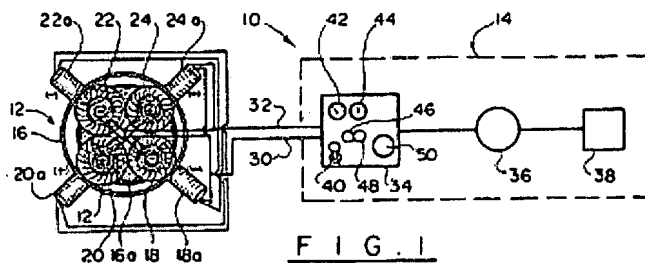

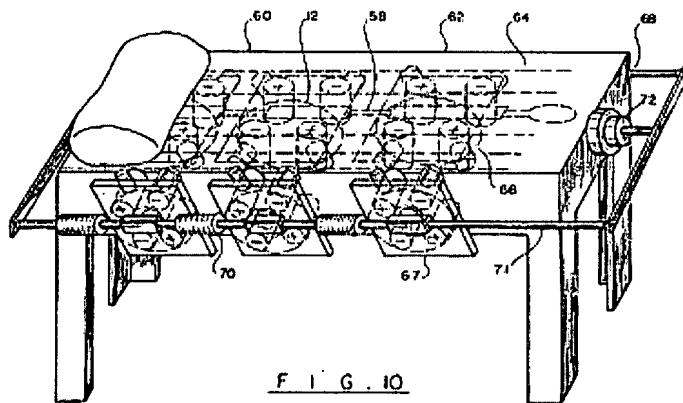

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Holcomb (US 6,042,531).

Holcomb discloses a device for magnetically assisted surgery utilizing a medical device within a patient comprising: a magnet support structure; a magnet having at least four poles, the magnet attached to the magnet support structure so that the magnet provides a near-field magnetic field in an operating region within a patient, the magnet

Art Unit: 3737

being moveable to alter a direction of magnetic field lines in the operating region within the patient (see figures 9-11), wherein the magnet is a quadrupole magnet (see figure 1), wherein the magnet is a permanent magnet (see figure 6 and related description), wherein the magnet is generally cylindrical and has a radius and an axis perpendicular to its radius (see column 49, lines 20-67, column 50, lines 1-28).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
